

CAFÉ ORDER ANALYTICS

Turning 351 orders into a menu & staffing strategy

The Business at a Glance

Four months of order data across breakfast, lunch, snacks and dinner

₹47,188

Total Revenue

across all order types

351

Total Orders

unique customer orders

573

Items Sold

units across 22 menu items

₹134

Avg. Order Value

per order, all meal types

Order mix

- Lunch
- Dinner
- Breakfast
- Evening Snacks

Lunch is the revenue engine, generating 43% of all sales (₹20,088) — more than dinner and breakfast combined with evening snacks.

Which Items Sell the Most — and the Least?

Units ordered per menu item, Feb – Dec 2026

TOP 5 BY UNITS SOLD

LOWEST 5 BY UNITS SOLD

Takeaway: Tea and Coffee dominate on volume — they're low-cost, high-frequency orders. Chicken Biryani is the only high-ticket item that also sells in volume. Cold Coffee, Veg Biryani and Veg Pizza are candidates for a menu review or a promotional push.

Which Items Actually Drive Revenue?

Total sales amount (₹) contributed per item

LOWEST REVENUE ITEMS

Iced Tea

₹835

Veg Pizza

₹725

Cold Coffee

₹122

Chicken Biryani alone contributes 15% of total sales value (₹7,236).

When Does the Café Make Its Money?

Revenue (₹) by hour of day

Takeaway: Two clear peaks — 1pm lunch (₹7,825) and 9pm dinner (₹9,059) — plus a smaller mid-day bump. Late evening (7pm, 10pm) is nearly dead. Staffing and stock should track these peaks rather than run flat all day.

Best & Worst Sellers, Meal by Meal

Top item and lowest item by units ordered, within each order type

Breakfast

TOP SELLER

Tea — 36 units

LOWEST SELLER

Maggie — 7 units

Consider spotlighting the top seller in-store and re-evaluating or bundling the slow mover.

Lunch

TOP SELLER

Chicken Biryani — 40 units

LOWEST SELLER

Veg Momo — 1 unit

Consider spotlighting the top seller in-store and re-evaluating or bundling the slow mover.

Evening Snacks

TOP SELLER

Coffee — 27 units

LOWEST SELLER

Lime Soda — 1 unit

Consider spotlighting the top seller in-store and re-evaluating or bundling the slow mover.

Dinner

TOP SELLER

Lime Soda — 22 units

LOWEST SELLER

Fried Rice — 2 units

Consider spotlighting the top seller in-store and re-evaluating or bundling the slow mover.

Menu Versatility & Order Size

ITEMS ORDERED ACROSS 3+ MEAL TYPES

Tea	Coke
Lime Soda	Burger
Chicken Noodles	Chicken Pizza
Veg Pizza	

These 7 items appear on breakfast, lunch, snack and dinner orders alike — reliable, all-day performers worth guaranteeing stock for.

UNIT PRICE vs. QUANTITY ORDERED

-0.17

correlation between an item's price and the quantity ordered

A weak negative relationship: cheaper items (Tea, Coffee, Juice) do sell in higher volume, but the effect is mild — mid- and higher-priced items like Chicken Biryani (₹160+) still move well. Pricing isn't the main lever; taste and meal-time relevance matter more.

Actionable Recommendations

What the data suggests for menu, stock and staffing decisions

1

Stock up on proven winners

Guarantee availability of Tea, Coffee and Chicken Biryani — they drive both volume and revenue.

2

Review the tail

Cold Coffee, Veg Pizza and Veg Biryani sell the least; consider recipe tweaks, repricing, or retiring them.

3

Staff for the peaks

Concentrate staff and prep around 1pm and 9pm, the two clear demand spikes — not a flat all-day schedule.

4

Bundle for lunch

Lunch already drives 43% of revenue; combo deals around Chicken Biryani and Fried Rice can push this further.

5

Promote the slow movers

Use small discounts or add-on offers to move Iced Tea and Veg Pizza rather than letting them sit unsold.

6

Protect the all-rounders

Tea, Coke, Lime Soda and similar items sell across every meal type — never let these go out of stock.
